

Driving tomorrow's technology.

Monimax 8800

The **Monimax 8800™** All in one Banking Kiosk is a interior ATM designed specifically for in-branch locations. The **Monimax 8800** is designed to handle advanced customer care service requirements, whilst providing the flexibility to provide video conferencing and large range of retail transactions, including bill payment, Video banking, Cash recycling, Cheque accepting and NFC feature.

Maximize Branch Productivity

The Monimax 8800 features combination of large 24" screen and 15" multi-touch screen that open up the self-service terminal to a range of new functionality including product and service applications, customer data management, and interactive customer advertising and offers. The **Monimax 8800** helps you create and deliver great customer experiences.

With flexibility to meet the needs of the future, The **Monimax 8800** features an open architecture modular design providing the flexibility to take advantage of current and future capabilities including touch screens, contactless card readers and cash recycler.

High Reliability for maximum service at the lowest operating cost

Put through the industry's most stringent testing, the **Monimax8800** has been built for high uptime in Australia's extreme conditions. Able to integrate into a range of remote monitoring platforms, the **Monimax 8800** is designed to permit fast repairs and maintenance – delivering dependable interaction for your customers.

Productive

The consumers execute a wide range of transaction rapidly either completely via self-service, or with the assistance of an institution representative. Tan impressive list of standard hardware features, integration possibilities and the appropriate level of personal engagement enables them to maximise the time spent in the branch.

Comprehensive solution and support options

Nautilus-Hyosung provides a full range of solution delivery and managed service options, including transaction processing, transaction screen design, help desk, cash management and first and second level maintenance.
